I specialize in Fine Art, Architecture, Landscape and Event photography. I offer a range of presentation topics that can be combined for your group's needs. Presentations can be delivered in-person (depending on travel distance) or online.

While nice images are a key part of any photography presentation, all of my presentations include educational elements and, where possible, demonstrations of setup and techniques. The intent is to leave every attendee with something they can use in their own photographic pursuits. Note, however, that demonstrations may not be possible if the delivery method is online.

My presentations are best for beginner and intermediate level photographers. However, sharing my techniques often results in experienced attendees contributing to the discussion by sharing their own approaches and experiences. I encourage that.

Presentation topics currently on offer include:

- Drone Photography
- Adding Video to Your Photography
- Macro Photography
- Architectural Photography
- Black and White Photography
- Panoramas – In Camera vs. Post
- Event Photography Basics
- From Snapshots to Photographs – Adding Impact
- Photoessays
- Demystifying Gear Choices – What Do You Really Need?
- Astrophotography

Each of these topics typically runs 45 minutes, with added time for questions. Topics can be combined for longer meetings. Presentations are tailored to audience interests and experience.

Cost:

- \$100 per topic for items listed above, plus any travel expenses.
- Maximum travel distance – 100 km – for in-person talks.
